Subject: RE: SNUN Update

I think if we can answer those questions quickly without too much effort it would help us determine if even waiting for the data is worth it.

Hi

Sure...I can review the ECHA data but only provide an internal summary conclusion to EPA staff until we obtain the studies. Here are some things to consider;

I don't have the HH assessment yet. I think it just went to RAC so I wouldn't expect it to be done yet. I just wanted to see if we could keep working on the HH even though there is a glitch with the COC for eco?

Makes sense to move forward as the HH report will not be affected. I am assuming that you have a completed HH risk assessment, correct?

Subject: SNUN Update

I followed-up with our team about the eco data and they relied on the robust summaries from the ECHA registrations (links were provided in our submission). We are currently working with our colleagues in the EU to obtain copies of the full reports, but this may take a few days. I will provide an update as soon as possible.

We would also like to request copies of the EPA reports (I believe there are three: Exposure, Engineering, and Human Health) whenever they become available.

Thank you for all your attention on this case!

Best regards,

Mike LaFore
